Custom Virtual Design Service

Welcome to Stella Maris Design Studio, your ultimate destination for transforming your living spaces. We believe in creating spaces that not just look good, but feel good too. With our expertise in interior design, we offer you the chance to reinvent your home with our unique moodboards.

What is a Moodboard?

A Moodboard is a visual tool that communicates our concepts and designs. It is a well thought out and planned arrangement of images, materials, furniture, etc. that is intended to display a room design. In essence, moodboards are the first stepping stone of an interior design project.

What We Do

We create moodboards that are tailored to your style and needs. We take into account your desired personal style, as well as hard surfaces, paint, lighting, window treatments, rugs, furniture, art and some small decor. Our Moodboards will provide you with a clear vision of your room's potential, complete with **links to each item** and **DIY project suggestions** for you to purchase and complete at your own pace!

What We Need From You

Inspiration

Any Pinterest boards or images you have saved are helpful for us to create your perfect space. We'll also have a discussion to understand your personal style.

Pictures & Videos of Your Space

Pictures and videos are our best friend! Since our design service is completely virtual, we get the best understanding of your existing space through the pictures and videos you send.

Measurements of Large Items

If you have items that you'd like to keep and incorporate, such as couches, chairs, tables, etc., we need the overall measurements (**length, width, and height**) so we can design with your favorite pieces!

Measurements of Your Space

This is the most important step in the process. We need overall measurements of your space (**room length, width, and ceiling height**), as well as measurements between fixed elements such as windows and doors. [Please click here and watch this example of measuring a room.](#)
